

Conflict Materials

In response to the Dodd-Frank Wall Street Reform, Carrdan happily shares its status of use on Conflict Mineral products which includes tin, tantalum, tungsten and gold with our partners. As a global purchaser and supplier of goods we will make continued efforts towards due diligence within our supply chain to prevent the use of Conflict Minerals. Carrdan will also complete supplier surveys via letter and/or use the EICC- GeSi Conflict Mineral Reporting Template along with requests through the iPoint Conflict Minerals Compliance Platform (iPCMP).
